Juli 04, 2024

Spanien

Summary

- Develop strategic Data platform capabilities to create DnA product/services roadmaps from concept to development to launch, encompassing DnA platform adoption, product engineering, service design, security and compliance, and business process change.
- Demonstrate abstraction of DnA patterns and drive enterprise-wide scalability, reusability, and sustainability of Data platforms/services.
- Incubate and adopt emerging DnA technology paradigms and launch technical data products/services faster with rapid prototyping & iterative methods to prove and establish value. For identified Data technologies, launch to enterprise scale, ensuring value is derived.
- Focus and align DnA innovation efforts with the Business strategy, IT strategy, and legal/regulatory requirements.
- Establish and update strategies, implementation plans, and value cases to implement emerging DnA technologies.
- Drive DnA innovation using appropriate people, processes, partners, and tools.
- Identify and develop DnA capabilities & ecosystem partnerships aligning with DnA strategy and supporting Enterprise architecture and Integration.

About the Role

Major accountabilities:

- Has end-to-end accountability for services and products that are incubated, established, and delivered across cross-functional business areas spanning analytical, master data and data products.
- Serves as point of escalation, review, and approval for key issues and decisions.
- Take decisions on the resource and capacity plans in line with Business priorities and strategies and close collaboration with delivery teams.
- Decide on continuous improvement within the team.
- Decides on the program timeline, governance, and deployment strategy.

Minimum Requirements:

- University Degree and/or relevant experience and professional qualifications
- Solid understanding of Analytical and technical frameworks for descriptive and prescriptive analytics.
- Strong familiarity with AWS, Databricks, and Snowflake service offerings.
- Awareness of integration patterns across MDM/RDM and transactional systems.
- Production experience delivering data lake projects, including data acquisition, quality, transformation, and publishing.
- Strong exposure to data security and governance policy definitions and enforcement capabilities.

- Data product-centric approach to defining solutions. • * Collaborate with business in gathering requirements, grooming product backlogs, driving delivery, and ongoing data product enhancements.
- Agile delivery experience managing multiple concurrent delivery cycles.
- Sound foundation in Analytical Data life cycle management.
- Awareness of Data product change Management and risk mitigation.
