

Research Informatics Product Growth Manager x3 (US or Switzerland)

Job ID
390898BR
May 08, 2024
USA

Summary

This position is available in Switzerland or US.

BioMedical Research (BR) is the global pharmaceutical research organization of Novartis. With approximately 6,000 scientists and physicians around the world, our research is focused on discovering innovative new drugs that will change the practice of medicine. We have an open and entrepreneurial culture, encouraging collaboration to make effective therapies.

At BR, our mission is to discover innovative medicines that treat disease and human health. To do that, our scientists need cutting-edge, state-of-the-art computing systems.

With Research Informatics (RX), BR is making a strategic investment into informatics capabilities and is positioning itself to deliver the systems and services that are critical to the future of drug discovery.

About the Role

The Scientific Data and Products (SDP) group in RX builds and applies excellence in product and data management to continuously improve the impact and value of software and data to NIBR. We deliver intuitive, intentional, and integrated software solutions that create a frictionless user experience.

As an Associate Director Product Growth Manager you flexibly engage to lead diverse active development initiatives in the Product matrix within the context of an existing Product or software application, in leading and coordinating activities across multiple Products, or in creating a new Product or software application. You ensure the initiatives you lead contribute to an intentional, integrated, and capability-based product architecture and continuously increase the value defined by the strategic mandates of our Product Lines to deliver significant impact to drug discovery.

Key Responsibilities:

You use your knowledge of science and drug discovery as well as your understanding of the RX Product ecosystem and our strategic context to evaluate or invent new solutions across business domains. To do this, you co-lead medium to large matrixed, cross-functional teams consisting of software, data and infrastructure engineers, business analysts, designers, and user supporters and trainers, or you coordinate execution across several existing cross-functional teams.

Specifically:

- You provide strategic context and focus to the teams, facilitate prioritization, and cultivate good team-based decision-making practice.
- You actively and transparently manage, and communicate to, all key business leaders to co-create visions and roadmaps for the initiatives you lead, and you define how we measure their success and value delivery.
- You shape your teams' culture and processes for success by exemplifying excellence in leadership and product management.
- You ensure adherence to security, quality, and regulatory standards and policies, including GxP compliance if applicable.

Essential Requirements:

- Domain expertise in a core drug discovery scientific field such as biology, chemistry, computational sciences or core supporting field, with a broad knowledge of drug discovery
- Team leadership experience in an agile environment within a complex enterprise organisation
- Good experience in scientific software product management in a sophisticated matrix environment
- Creativity in identifying, encouraging, and accelerating innovative solutions, including in GxP regulated environments if applicable
- Ability to effect change, manage conflict, and create consent through direct and indirect influence
- Proficiency in English (written & oral)

You'll receive:

You can find everything you need to know about our benefits and rewards in the Novartis Life Handbook.
