Summary

Senior Specialist for project delivery for Process Mining in the LDC S/4 Program. Partner with Global Core Enablement Business and IT leads and Adopt/Country stakeholders and for use case analysis, solution design.

Responsible for Supplier and APD operations engagement of LDC Process Mining use cases, ensuring their stability and integrity and meeting customer service levels

About the Role

Your responsibilities include but not are limited to

- Manage the Celonis EMS (execution management system) process analysis and ensure standard methodologies and recommendations from Celonis EMS are followed.
- Ensure platform architecture consistency, data model design with the Celonis EMS platform roadmap, in line with the low code / no code principle.
- Prioritize solution design, development and deployment efforts for projects by compiling required resources and assigning responsibilities according to a defined time schedule. Ensure use cases adhere to architectural roadmap and support the development, execution and operations of solutions.
- Ensure that solutions meet requirements outlined in the design documentation. Ensure the overall user experience is taken into account when designing and deploying new solutions and services. Ensure that developed solutions are peer reviewed, formally documented and signed off by business.
- Ensure that all work is delivered to agreed time, cost and quality constraints. Initiate solution testing to ensure they meet quality standards.
- Ensure standardized design and development processes to enable efficient delivery are followed. Authorize and conduct service handover and lead the go-live authorization discussions with the other work streams.
- Ensure that all release and deployment packages can be tracked, installed, tested, verified and backed out (if required). Ensure that release delivers the encouraged outcomes and value for the customers. Take accountability to ensure adherence with Security and Compliance policies and procedures within Solution Delivery scope.

Minimum Requirements

- Expertise in designing, deploying and operating SAP (preferably S/4) Process Mining use cases with Celonis EMS.
- Deep Knowledge of Celonis EMS process analysis and data engineering,
- Expert understanding of application development, and methodologies, superior communication skills; expert ITIL / Agile / GxP, analytical and problem-solving skills.

- Degree in Engineering, Information Management or Computer Science, with consulting experience and IT knowledge.
- Deep Knowledge of Celonis EMS process analysis and data engineering,
- Extended experience with Agile tools and techniques.
- Project / Program Management experience
