

Senior Specialist, Master Batch Record (MBR) Design

Job ID REQ-10008983 May 28, 2024 USA

Summary

At Advanced Accelerator Applications, a Novartis company, we are committed to leading innovation in nuclear medicine and delivering the next generation of targeted radioligand therapy to cancer patients. We are looking for experienced Supply Chain professionals to help us reach our ambitious goals.

Location: On-site

The Senior Specialist, Master Batch Record (MBR) Designer plays a pivotal role in supporting Manufacturing Execution Systems (MES) operating sites by providing expert design and business process support. This role is responsible for the delivery and updating of MBR Design Elements, ensuring alignment with global core processes. It also includes the responsibility of providing basic MES trainings and best practice sharing across Novartis Radioligand Therapy sites, enforcing process standardization and harmonization, and managing future MES business requirements.

About the Role

This role is essential in ensuring the smooth operation and continuous improvement of MES systems across all Novartis RLT sites, contributing significantly to the organization's efficiency and compliance standards.

- Designing and updating MBRs in alignment with global core processes.
- Providing business support during Site MES Deployment Projects.
- Conducting site Process Analysis and fit-gap analysis for project preparation in coordination with Global Process Business Owners.
- Managing and updating guidelines based on global MES governance rules.
- Reviewing and consolidating MES software errors, prioritizing fixes in collaboration with the MES IT team.
- Attending Change Advisory Board meetings and prioritizing MES Business Change requests.
- Ensuring effective collaboration across all business units and manufacturing facilities.
- Maintaining the Global Process Model and conducting regular training sessions on MES.

Minimum Requirements:

- Bachelor's degree in business administration, Economics, Computer Science, Information Technology, or related field is required.
- 5+ years of relevant experience in MBR design, preferably within the pharmaceutical industry is required.
- Previous GMP experience is required.
- Proven track record of collaborating across boundaries and influencing without authority.

- Interaction with senior management and leveraging digital technology/big data.
- Relationship management experience and multinational global exposure.
- Ability to manage challenges and think proactively.
- Willingness to undertake business travel and adapt to remote working conditions.
- Good communication skills and readiness to learn new technologies.

The pay range for this position at commencement of employment is expected to be between \$118,400 and \$177,600 year, however, base pay offered may vary depending on multiple individualized factors, including market location, job-related knowledge, skills, and experience. The total compensation package for this position may also include other elements, including a sign-on bonus, restricted stock units, and discretionary awards in addition to a full range of medical, financial, and/or other benefits (including 401(k) eligibility and various paid time off benefits, such as vacation, sick time, and parental leave), dependent on the position offered. Details of participation in these benefit plans will be provided if an employee receives an offer of employment. If hired, employee will be in an "at-will position" and the Company reserves the right to modify base salary (as well as any other discretionary payment or compensation program) at any time, including for reasons related to individual performance, Company or individual department/team performance, and market factors.
