Slovenia

Summary

In TRD Biologics & CGT, more than 1,000 associates spread across 5 locations are fully committed to deliver on our evolving pipeline of transformative treatments. We develop Biologics & CGT drug substance and drug products from candidate selection up to launch and drive competitive advantage through agility, innovation, and scale to best serve our portfolio, partners and patients.

Plan, perform and document scientific experiments for the preparation and timely delivery of drug products, processes and procedures in collaboration within a multifunctional project team coordinated by a Project Leader.

We are looking for an Associate Expert Science & Technology in Drug Product (DP).

About the Role

Key responsibilities:

- Understand applied practice, concepts and processes. Operate within established procedures with some latitude for decision making on expected issues and laboratory/pilot plant procedures.
- Provide documentation for development studies, materials and activities for established development processes, methods or procedures as according to templates, protocol master batch record. Record raw data, reviews and verifies raw data generated by others.
- Take over responsibility for and utilize tools/equipment or specialized facilities under moderate supervision; usage and handling of equipment, schedule and execute regular maintenance and qualification of instruments/equipment
- Write protocols, reports or lab procedures based on templates under moderate supervision
- Handling of chemicals, intermediates, excipients, standards, samples or consumables.
- Trained for all operations to support manufacturing of tox batches.
- Recognize, communicate and provide input to the solution of complex problems
- Propose ideas for continuous process improvement in area of expertise as a member of a team and follow up on implementation.

Role Requirements:

- BSc degree in pharmacy, pharmaceutical technology, chemistry, engineering sciences, or another relevant scientific field
- Knowledge of the English language.
- Good knowledge of laboratory, pilot plant and/or technical tools.
- Adequate knowledge of software and computer tools.
- Awareness for safe handling of chemicals, potentially dangerous materials and equipment.
- Adequate scientific or technical knowledge in a specific area (e.g. synthetic, analytical, galenical, machinery).
- Basic knowledge in scientific/technical areas of collaboration.

We offer work in a dynamic environment, collaboration with various teams, and knowledge and experience exchange within the global Novartis system. You are kindly invited to submit your application, including CV, by **16 August 2024**.
